

Please Note!
These bulls have been at Rose Bud Feeders in Heber Springs, AR since late April. Drought conditions in AZ put feed resources at risk so we moved them to a better location to be developed and sold!

Welcome Friends,

We are proud to offer this set of bulls for your review. The Genetic Potential they have to add value to their calves and profit to your operation is accountable and real. Many of the bulls represent the second generation of Feed Efficiency Tested Hybrid Genetics. These bulls are all DNA tested to increase the accuracy of their EPDs to insure the fastest selection process to reach your breeding goals.

Bar T Bar Ranch is the most proven range cowherd in the Southwest. Every cow has a calf in 45 days or she is culled to the commercial herd. Over half the cowherd is a Dam of Merit, Dam of Distinction, or a daughter of one.

These bulls were weaned in the drought of 2020 but still posted an average adjusted weaning weight of 630# and the cows bred up at 95% pregnant in 60 days! That is the definition of thriving in adversity! These bulls are ready to go to work for you!

Sincerely,

Bob & Judy Prosser

Bar T Bar Ranch

One year guarantee: This guarantee covers your purchased bull against death, injury, infertility and loss of use. If the bull in question can be salvaged, we would like you to keep that salvage value and we will issue you a credit for the difference to purchase another bull from us. If the bull is turned out for breeding, the credit will be given at 75% of purchase price less the salvage value. All claims must be made within 1 year of purchase. Contact: Bob Prosser: 928-289-2619

About The Catalog:

Color possibilities:
 Red
 Black - known red carrier
 Homo Black - known homozygous black
